MAX-metal™ LITE
Excellent for Cost
Conscious Projects!

MAX-metal™ Lite is a 3 mil Aluminum Composite Panel designed for indoor and outdoor applications where being cost conscious is encouraged. This 2-Sided substrate boasts 0.12mm aluminum skins on both sides and is paired with a robust LDPE core. This lightweight panel makes installation easy while maintaining durability for a long lasting sign. MAX-metal™ Lite is ideal for a variety of applications such as: POP signage, way-finding, site signs and is UL recognized for use as a component in electrical signage.
